

01 PAW TIME

Let's work together.

A cat game for spot workers that shows who fits, before and after every shift.

02 · PROBLEM & URGENCY · OUR STORY

This summer, we applied. Many never wrote back.

✉ **Applied · Café crew**

NO REPLY

✉ **Applied · Warehouse**

NO REPLY

✉ **Applied · Event staff**

NO REPLY

...and then, silence.

02 · PROBLEM & URGENCY

AI floods applications. None of them say who fits.

1 AI applies for everyone

2 Only outcome data shows fit

3 No tool collects it

WHAT

+412%

applications per recruiter

Greenhouse data, Fortune, Jul 2026

WHY IT MATTERS NOW

\$20

buys AI mass-applying

Fortune, Jul 2026

WHO

4.52M

spot workers in Japan, the most frequent hires

Persol RI, 2025

WHY OPTIONS FALL SHORT

1 of 4

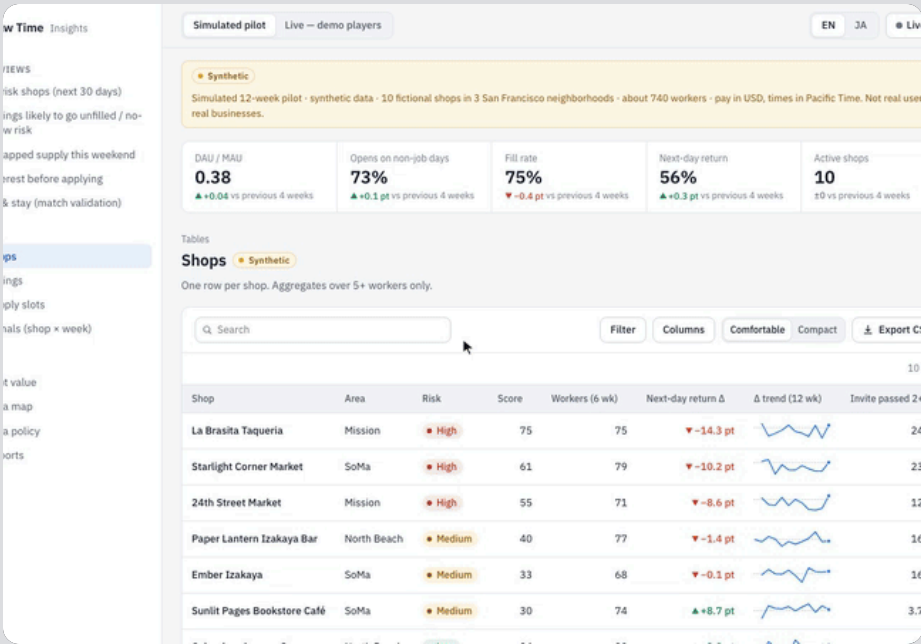

moments job apps can see

03 · INSPIRATION / KEY INSIGHT

Recruit's CEO: "Something's wrong."

"1,000 applications, and all 1,000 are not qualified? Something's wrong."

Hisayuki "Deko" Idekoba · CEO, Recruit Holdings & Indeed · Fortune, Sep 21, 2026

Only outcomes show who fits.

03 · INSPIRATION / KEY INSIGHT

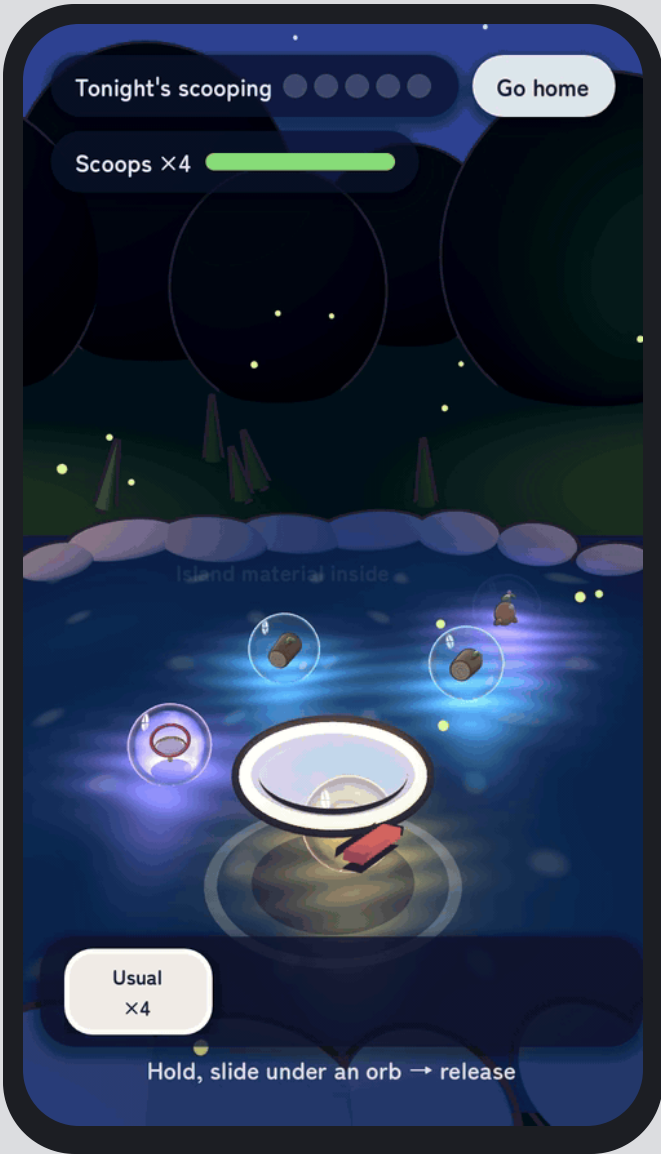

Job apps are only opened when people look for work.

WHAT WE OBSERVED · A TYPICAL WEEK [ILLUSTRATIVE]

Job app	M	T	W	T	F	S	S
Paw Time	M	T	W	T	F	S	S

REVEALED So outcome data is never collected.

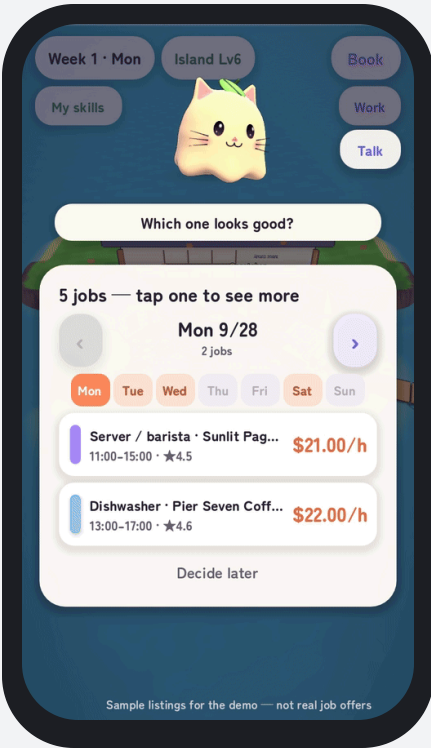

UNLOCKS A game opened daily can collect it.

04 · SOLUTION OVERVIEW

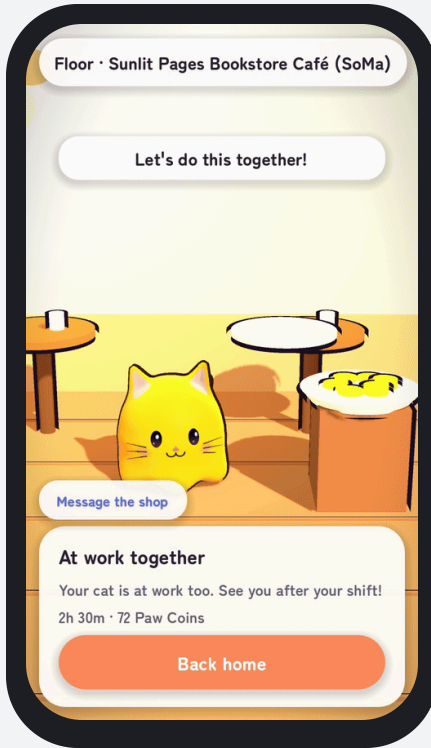

A cat that brings shifts and knows when to stop.

WHO IT IS FOR Spot workers · their shops · Recruit

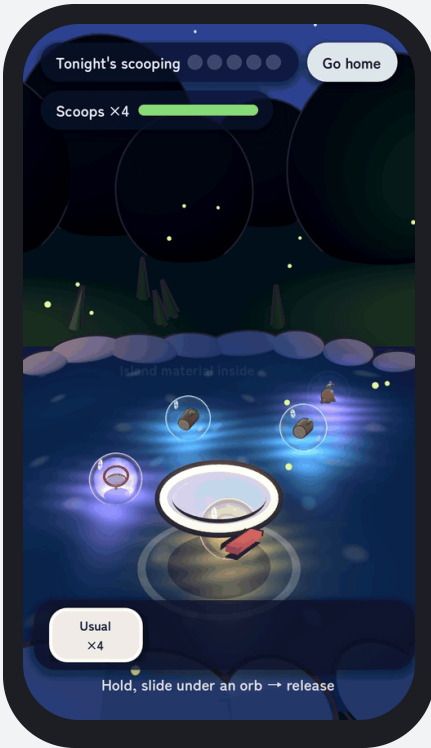

1 PICK

Shifts that fit

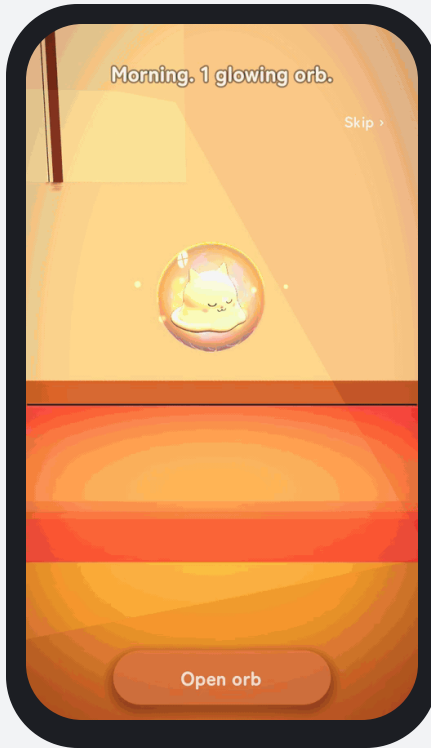

2 WORK

Gets tired with you

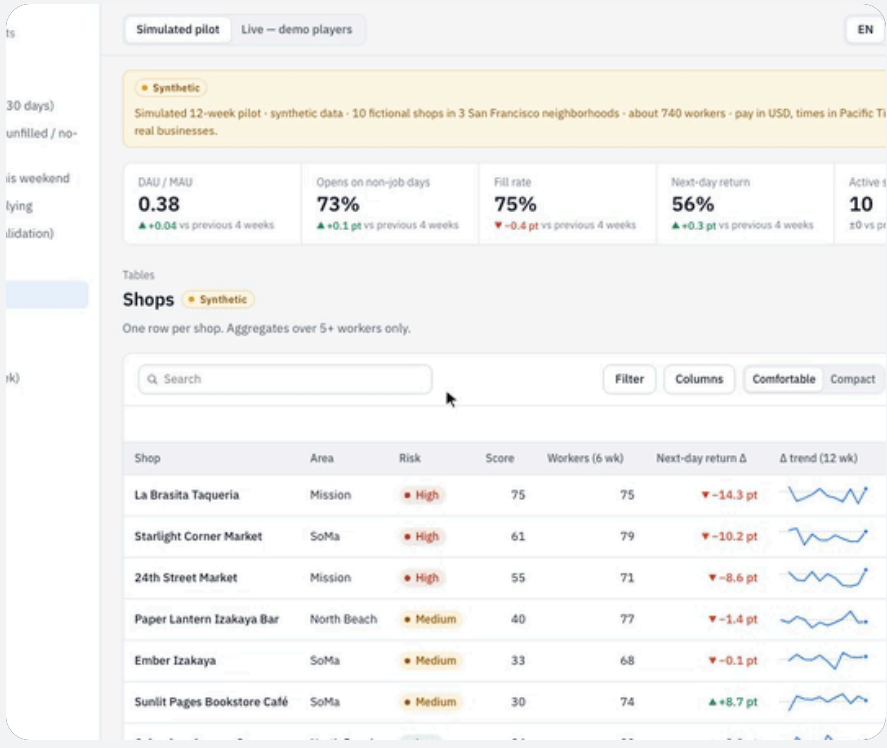

3 NIGHT

Scoop orbs

4 MORNING

Hatch rewards

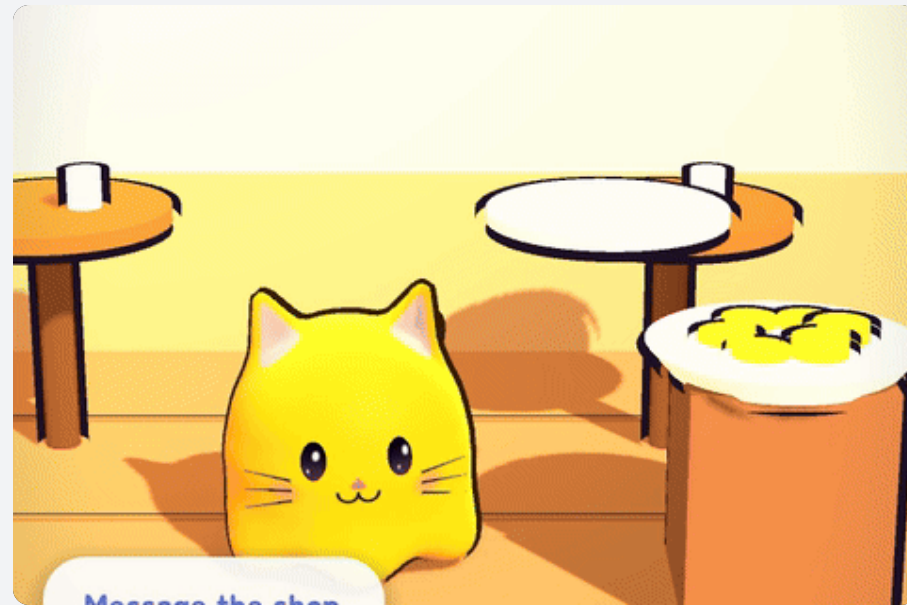

5 RECRUIT VIEW

Who fits, as data

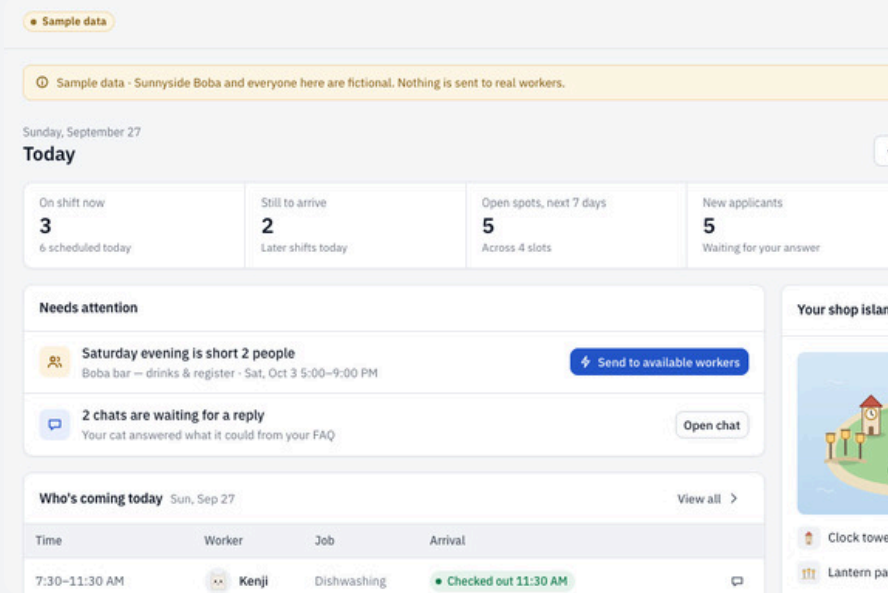

04 · SOLUTION OVERVIEW · WHAT CHANGES

Workers, shops and Recruit all come out ahead.

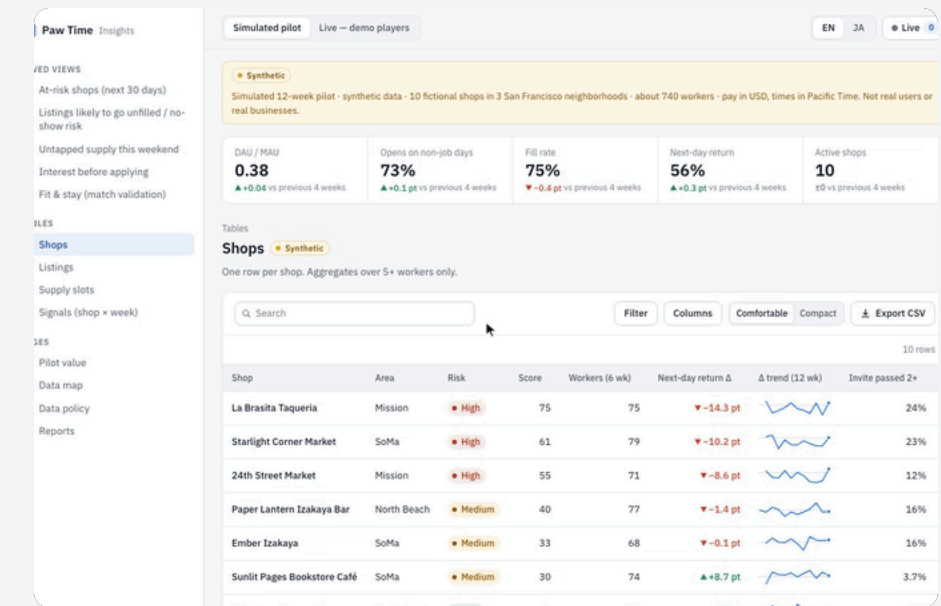

Workers

Shifts that fit, and a cat that says stop

Shops

People who show up and come back

Recruit

Fit-and-stay data after the hire

Play daily → Signals → Better matches → People stay → Better shifts ↻

05 · QUANTIFIED IMPACT

1% better matching in spot work $\approx$ ¥1.35B a year.

01 PRIMARY NUMBER

¥1.35B

a year, if matching improves 1% ($\approx$ \$9M)

¥134.7B $\times$ 1% = ¥1.35B

[ILLUSTRATIVE]

¥14.6B

same 1%, all of Recruit HR Tech

[ILLUSTRATIVE]

$\approx$ 9%

spot work vs. HR Tech revenue

[CALCULATED]

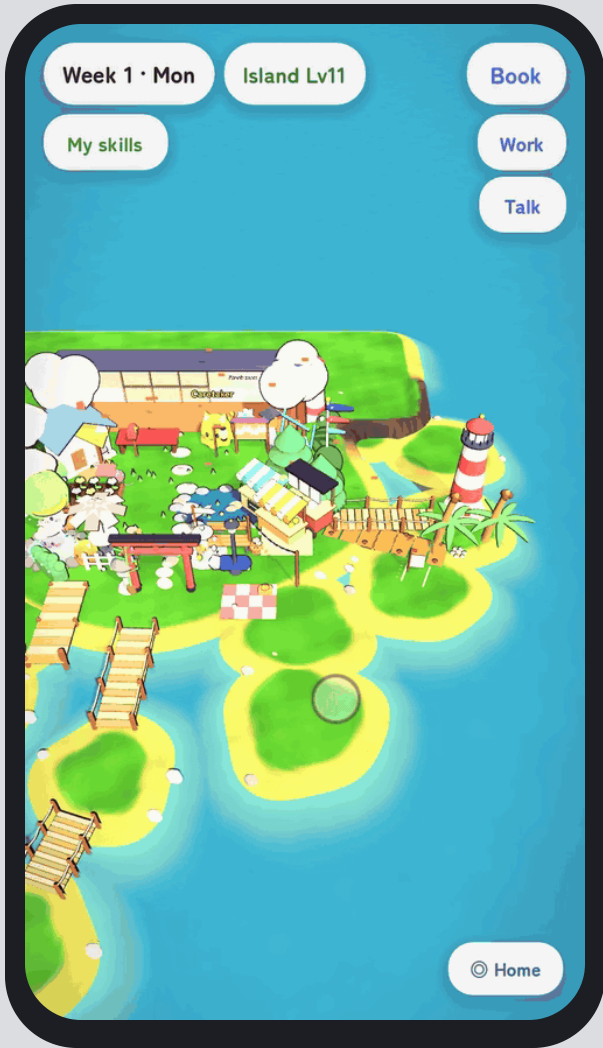

Spot-work market ¥134.7B: Yano Research Institute (FY2025 est.). HR Tech revenue ¥1,458.4B: Recruit Holdings FY2025. Assumes revenue moves 1:1 with match quality; the pilot tests the 1%.

06 · WHAT MAKES THIS DIFFERENT?

AI can write applications. It can't show up every day.

HOW IT IS DIFFERENT

WHAT EACH SEES	BEFORE	APPLY	SHIFT	AFTER
Spot apps	☐	☒	☐	☐
Job boards	☒	☒	☐	☐
Paw Time	☒	☒	☒	☒

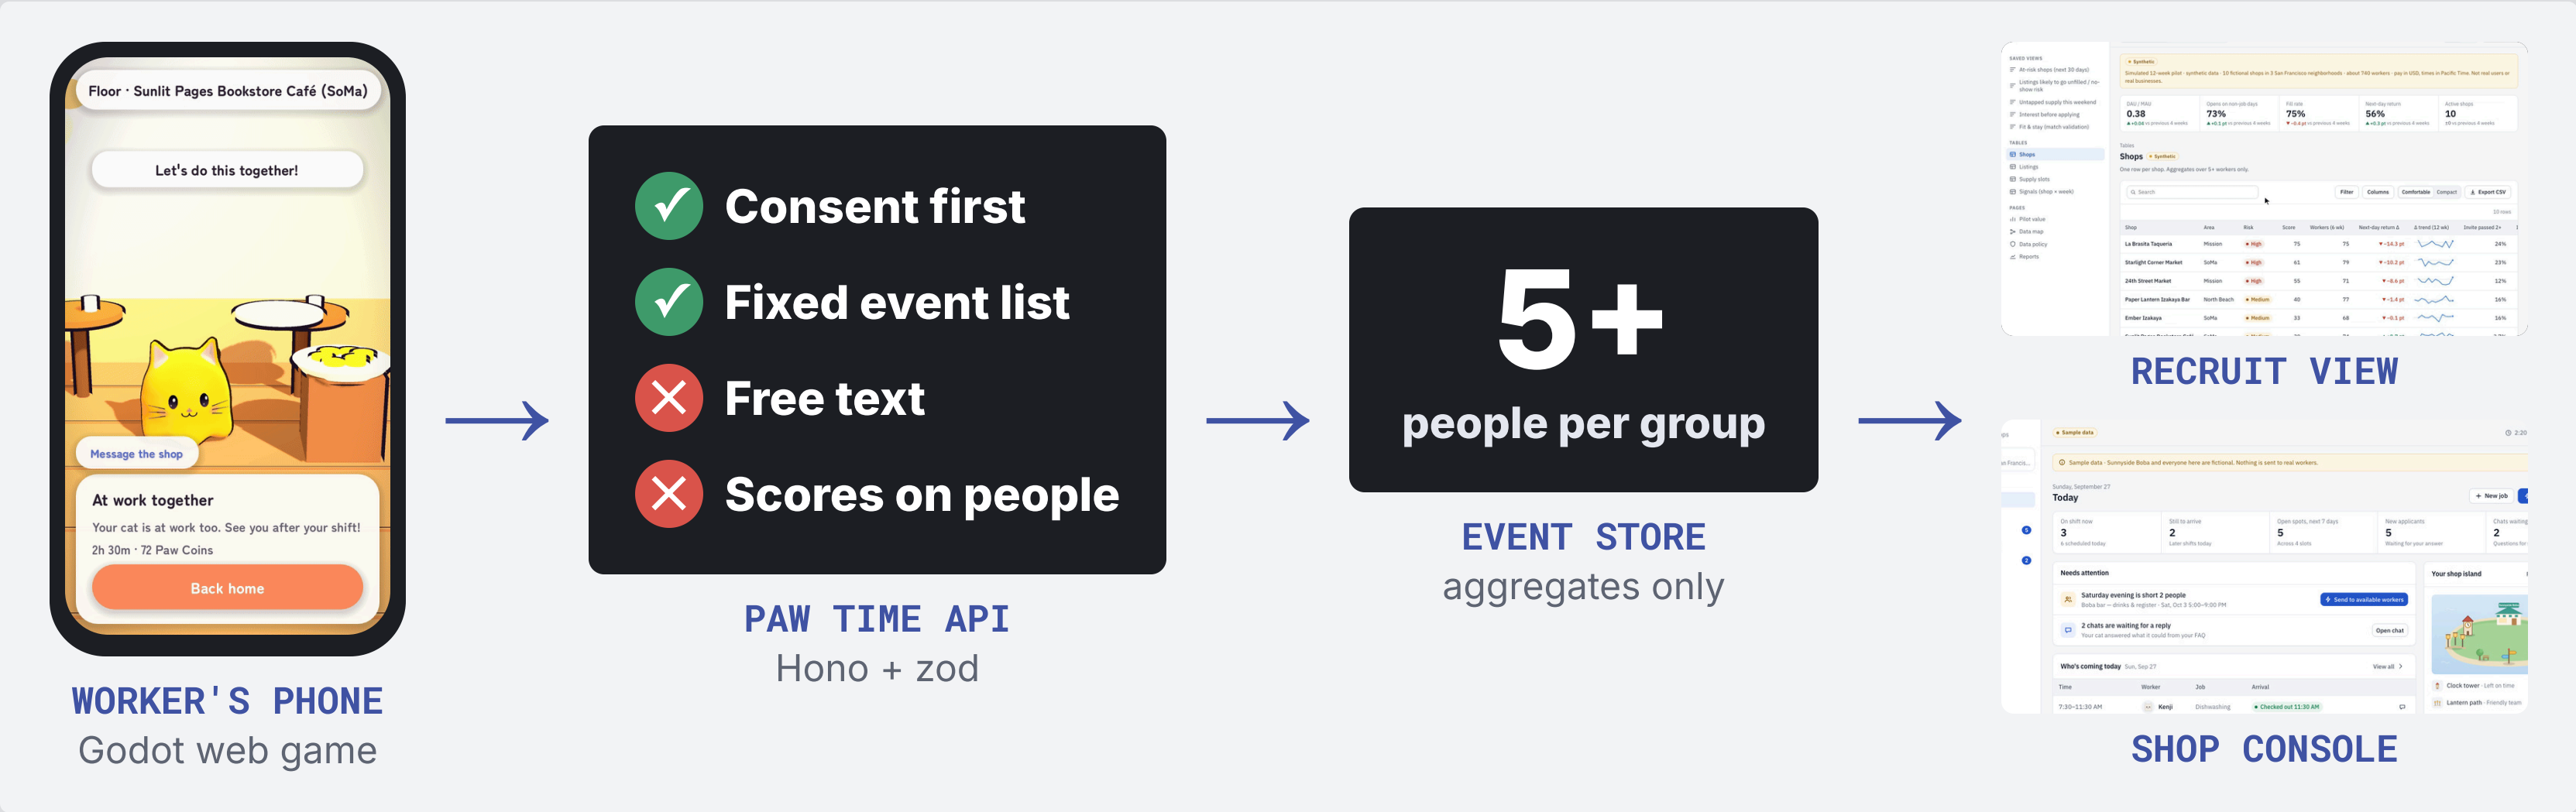

HARD TO COPY

A daily habit comes from a character people love.

07 · TECHNICAL DESIGN

Only fixed, consented events leave the phone.

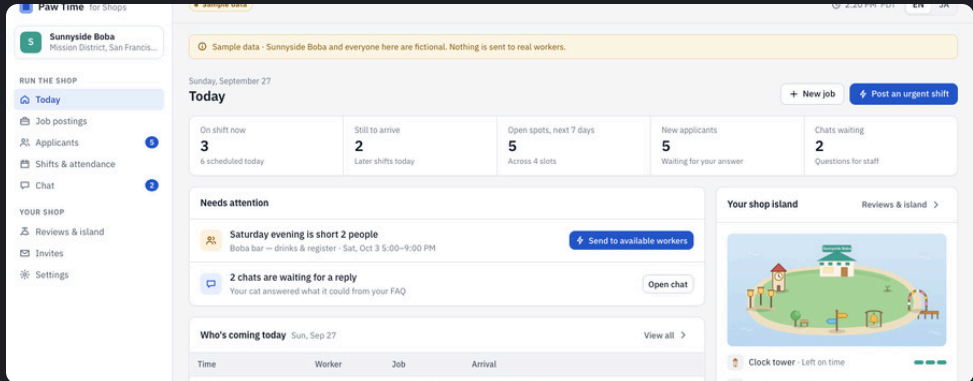

STACK

- TypeScript
- Hono + zod
- Vercel
- Next.js 15
- Chart.js

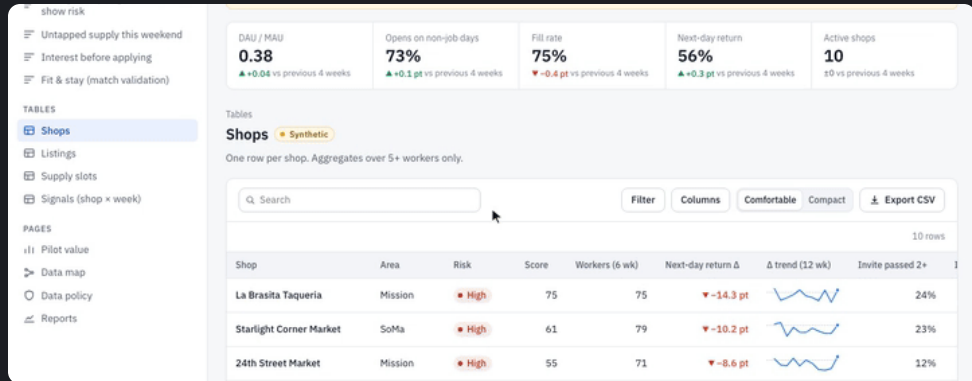

08 · FUTURE ROADMAP

Let's fix the job market, together.

01 NEAR TERM · 0–3 months

Pilot: 3–5 shops, 4 weeks

02 MEDIUM TERM · 3–12 months

One city, Recruit listings, +1% target

03 LONG TERM · 1–3 years

Inside Indeed matching, Japan + US

FASTEST ACCELERATOR

Five pilot shops + Recruit listings
